

OBJECTIVE

Results-driven Data Analyst with a strong foundation in Python, Excel, and Power BI, skilled in data cleaning , transformation, and building interactive dashboards to drive actionable insights. Adept at analyzing complex datasets, identifying trends, and supporting data-driven decision-making. A quick learner with strong problem-solving abilities, seeking to leverage analytical skills and practical experience to contribute effectively in a dynamic, growth-oriented organization.

SKILLS

- **Programing** : Python, SQL.
- **Tools** : Power BI, Excel, Github.
- **Frontend Development** : HTML , CSS , JS.
- **Platforms** : Jupyter, VS Code, Thonny IDLE.
- **Other** : Machine Learning, Artificial Intelligence.

EXPERIANCE

Data Analyst Intern | QSpiders | [Link](#)

Jan 2026 - Present

Currently working as a Data Analyst Intern, gaining practical experience in data cleaning, transformation, and analysis using Excel, Python, and Power BI. Building interactive dashboards and reports, applying data visualization techniques to uncover trends and insights, and supporting data-driven decision-making through structured data handling and analysis in real-world scenarios. Collaborating on tasks involving data preprocessing, KPI tracking, and generating meaningful business insights through well-structured visualizations.

PROJECTS

Mobile Sales Dashboard | [Link](#)

Feb 2026 - March 2026

Developed an interactive Power BI dashboard to analyze mobile sales across multiple dimensions, including cities, time, products, and payment methods. Performed data cleaning and transformation to ensure data accuracy, and implemented dynamic filters and slicers for real-time analysis. Delivered actionable insights on sales performance, customer behavior to enabling effective data-driven decision-making.

Lung Cancer Detection Using CT Scan Image Processing | [Link](#)

June 2025 - Dec 2025

Developed a lung cancer detection system using Convolutional Neural Networks (CNN) with TensorFlow and Keras to classify CT scan images with high accuracy. Performed image preprocessing, augmentation, and feature extraction using OpenCV and NumPy to enhance model performance. Built an end-to-end application to process medical imaging data and generate predictive insights, ensuring efficient analysis and reliable results.

Interactive Portfolio Website | [Link](#)

Nov 2024 - Feb 2025

Designed and developed a responsive portfolio website to effectively showcase projects, skills, and professional experience, ensuring a seamless user experience across devices. Implemented modern UI design principles and structured layouts to enhance readability and navigation. Optimized website performance for faster loading and improved accessibility, ensuring consistent behavior across different browsers and screen sizes. Enabled clear and professional presentation of technical capabilities and project work.

EDUCATION

Hirasugar Institute of Technology, Nidasoshi

Nov 2022 - Present

BE in Computer Science and Engineering | CGPA : 8.98 /10

CSE

CERTIFICATION

Programming in Python (InfosysSpringBoard) | [CERTIFICATE](#)

June 2025 - August 2025

Covers core concepts including data types, control structures, functions, and object-oriented programming. Demonstrates ability to build applications and solve real-world problems using Python.

Machine Learning (Place Mantra) | [CERTIFICATE](#)

March 2025 - May 2025

Focused on core concepts supervised and unsupervised learning, model building, and evaluation techniques

Fronted Web Development (Unified Mentor) | [CERTIFICATE](#)

Sep 2024 - October 2024

Covers HTML, CSS, JavaScript, and responsive design principles for building interactive user interfaces. Demonstrates ability to develop dynamic and user-friendly web applications.
